

EDUCATION FOUNDATION FOR AEROSPACE

The California Air Force Association (CAFA) founded the non-profit EDUCATION FOUNDATION FOR AEROSPACE (EFA), Inc in 2003, under IRS Section 501(c)(3). The foundation's primary focus is on education to preserve and present to the community the past, present and future of aerospace through educational history, technology, courses, programs and informational activities. EFA instills and promotes aerospace interests for teachers, students and educational institutions throughout California.

EFA is the single organization within CAFA that oversees funding of CAFA educational activities and programs within the state. EFA serves as a catalyst to California youth, Air Force families, CAFA Chapters, and the community through enhanced aerospace education programs focused on science, math, engineering, technology and similar educational activities.

EFA supports local AFA Chapters such as Sacramento's Claude Farinha, Gold Rush Chapter 116. Through coordination with EFA, Chapter 116 has presented over \$20,000 in scholarships during each of the past five years. Contributions to the Chapter 116 scholarship program may be made to the Education Foundation for Aerospace (EFA), designated for Chapter 116. All contributions made in this manner go directly to the Chapter 116 scholarship fund and are fully deductible as a 501 (c) (3) non-profit contribution. EFA's IRS Tax I.D. number is 43-1988851
